Mental health and schools

Pupils cannot thrive at school if emotional issues distract them in class. Teachers cannot teach effectively if pupils cannot concentrate.

That is why promoting good mental health is everyone's business – from headteachers and school leaders, to teaching assistants and playground supervisors.

Iechyd meddwl ac ysgolion

Nid yw'n bosibl i ddisgyblion ffynnu yn yr ysgol os bydd problemau emosiyonal yn tynnu eu meddwl oddi ar eu gwaith yn y dosbarth. Nid yw'n bosibl i athrawon addysgu'n effeithiol os yw disgyblion yn methu canolbwytio.

Dyna pam mae hyrwyddo iechyd meddwl da yn fusnes pawb – o benaethiaid ac arweinwyr ysgol i gynorthwywyr addysgu a goruchwylwyr amser ciniog/chwarae.

Who we are

Place2Be is a UK children's mental health charity. We provide in-school support and expert training to improve the emotional wellbeing of pupils, families, teachers and staff.

Founded in 1994, Place2Be has grown from working with a handful of schools, to providing direct support in over 400 schools across the UK, supporting a school community of around 225,000 children and young people.

Last year, over 54,000 teachers and other professionals accessed our Mental Health Champions – Foundation programme.

Our mission

To improve the mental wellbeing and prospects of children, their families and school communities across the UK.

Our vision

Children should not have to face mental health problems alone. Place2Be's vision is for all children to have the vital support they need to help them build lifelong coping skills and thrive.

How we help

Working in close partnership with school leaders, we offer:

- In-school mental health support for pupils, families and school staff
- Training for teachers, school leaders and school staff
- Reflective supervision and supportive forums for teachers, school leaders and school staff
- Accredited professional qualifications for individuals looking to become child counsellors, to ensure schools have access to qualified, experienced professionals.
- One to one counselling and online support to primary and high school pupils.

"We recognise that if children aren't in a positive space mentally, then their capacity to learn is severely hampered"

In-school support

Place2Be takes a whole-school approach to improve the emotional wellbeing of pupils, families and staff.

We provide mental health services in primary and secondary schools, offering vital therapeutic support around big changes and challenges in life. Our mental health support helps children to become more settled, more able to manage their behaviour and to engage in learning.

With Place2Be working in partnership with a school, teachers are able to focus on teaching and parents feel more confident and able to support their children.

Our in-school mental health professional is also on hand to respond swiftly to critical incidents, engage with external agencies, support staff initiatives and assist on all issues relating to children and young people's mental wellbeing.

"Having [the Mental Health Practitioner] in the school has been a great support. As well as the work with the children, having someone to talk through issues and to signpost has helped me feel more confident in my ability to support the families in our community"

Mental Health Champions – Foundation programme

Our online Mental Health Champions – Foundation programme will provide you with a deeper understanding of mental health and wellbeing.

This five-week programme is designed to be an introductory or refresher course for professionals who work with children and young people in schools and community settings.

Thanks to our supporters, school staff can access the programme for free for the second year.

What does it cover?

- **Understanding mental health and wellbeing** We discuss factors that contribute to positive mental health and wellbeing.
- **Nature and nurture** We explore how early experiences shape the way we perceive ourselves and relate to others, and how those experiences create the pathways in the brain that support our development.
- **How you can help** We consider what a child's behaviour might be communicating about their underlying needs.
- **Mental health: everybody's business** We reflect on the importance of positive mental health for everyone, with a focus on the adults around a child.

“ I found new ways to manage my own stress levels so staff and children had a calmer sense while around me. It was really fascinating and a different journey that I am enjoying being a part of.”
