

REMOTE CONTROL**HOW TO PLAY:**

- Children find a space. Ask the children what commands/functions /buttons are on a remote control for a DVD player?
- Give each button a movement such as:
 - Stop – freeze
 - Play – go
 - Fast Forward – speed up
 - Rewind – move backwards
 - Eject – jump
 - Slow motion – slow down movement
- Children move around the area, making sure they are aware of the children around them.
- Teacher calls out commands in no particular order. Children must respond appropriately.

Progression:

- When teacher says 'Play' they are to include a different travelling movement such as skipping, hopping and jumping.
- Speed up the commands.
- Use opposite commands, e.g. stop means go.

Resources

- Music is recommended to be played a very low level until the children have grasped the concept. Current chart music (radio edit versions)
-
